An Introduction to Sound Therapy with Astro-medical concepts

The SoundPlanetarium practice of sound therapy is based on ancient as well as modern insights into the evolution of the human being in close correlation with rhythms and energetic influences of the universe. Man as a cosmic being is formed through the life rhythms of the universe especially the planetary system.

Core impulses are based on the philosophy of Dr Rudolf Steiner (Anthroposophy) and 15th century medical genius 'Paracelsus' known to have been the most important medical man of the last millennium. Their philosophies have been moulded into sound energy treatments that target states of union with the universe both energetically and mentally. Hearable sound frequencies that are synonyms for cosmic rhythms have been identified (planet frequencies) and utilized to be targeting human disconnections with their universal origin in order to tune inner systems to reconnect with their cosmic creative sources. Mental and emotional experiences of union with the cosmos are elevated.

Utilizing our collection of 40 frequencies the SoundPlanetarium treatments are similar to homeopathy. Applying one or a few frequency-based recipes we have a chance to bring about more complete states of resonance with the universe into the human experience which is plagued by suffering. Some treatment target actual symptoms of disease others offer personal growth.

The SoundPlanetarium technique is truly Whole-istic.
